

EnterpriseBSD

Bringing FreeBSD closer to the business users

What is it ?

- New project still in planning phase
- Repackage of the normal FreeBSD distribution oriented towards the enterprise/business environment
- Wants to offer commercial backing and support
- Wants to promote usage of FreeBSD in the enterprise

EnterpriseBSD

Bringing FreeBSD closer to the business users

What it's not ?

- Not going to diverge too much from FreeBSD
- Not going proprietary
- Not going to strip off ports/packages/PBI/etc
- Not going to limit access to established procedures
- Not going to require GUI (X11)

EnterpriseBSD

Bringing FreeBSD closer to the business users

Focus and features

- Easy to use packaging framework (dpkg/apt)
- Polished administration tools frontend
- QA and stress-testing
- Coping with commercial applications
- Improvements for virtualization/cloud computing
- Whatever else you need in your enterprise !

EnterpriseBSD

Bringing FreeBSD closer to the business users

What it may look like

- dpkg/apt-get for install & update of packages
- useful (GNU) tools installed by default (bash, ip, ...)
- Kernel tuning for business applications
- CLI and GUI tools for easy system administration
- ZFS root/boot
- GRUB
